CALIFORNIA FLY FISHERS UNLIMITED

SACRAMENTO'S OLDEST FLY FISHING CLUB SINCE 1962

March 2017

CASTING NEWS FROM DAVE LENTZ

One of the wettest water years in decades has filled the high country with deep snow pack. While most rivers and streams are high and off-color and hard to fish right now the conditions for stream fishing this summer should be very promising. During the drought many Sierra streams suffered from reduced flow, higher water temperatures and diminished habitat for trout and other fish. In some places populations of wild trout shrunk in numbers along with the shrinking habitat. So, while there will be lots of water this year, some places may hold fewer trout than the habitat would normally support. It could take one or more years for the trout population to catch up to the numbers a stream typically supports with normal flows. Lakes and reservoirs might be the best fishing options for the near term and even should be fishing better longer into summer.

CFFU will be expanding our fishing outings menu this year—revisiting some old places and exploring some new ones. Stay tuned as we develop more details on the outings front—should be some good conditions to take advantage of this year.

Regards, Dave Lentz

MARCH 2017 SPEAKER

Our March 7th speaker is Brett Wedeking and he will be presenting a program on Alaska: From Do It Yourself to Fly-Out Lodge. Alaska is geographically enormous and filled with endless fishing opportunities. But, with such a vast array of options, how do you begin planning a trip? Brett's discussion will help you identify your Alaska dreams and offer options and tips for planning your adventure. He will concentrate on Trout and Salmon fishing in Southwestern Alaska and the famous Bristol Bay region, but will also include the Kenai Peninsula road system and a bit on Southeast Alaska as well. Alaska has something for every budget and every angler's life list. There will be a short film and slideshow and Brett will answer any questions you may have.

Brett has been fly fishing since high school and spent 10 years guiding in Washington State for Trout and Steelhead. He moved to the Bay Area 6 years ago and works for the prestigious Lost Coast Outfitters in San Francisco. He guides in Alaska every summer and somehow finds time to tie custom flies and write articles for magazines. Brett is one of the nicest guys in the industry and you might remember him from the clinic he gave our club on Putah Creek for the President's Outing last October. You don't want to miss this program!

Ken Giesser
Programs Director

FLY TYING DEMO

Come see March's demo tier Brett Wedeking. He will start tying at 6:15 pm so come early to watch him tie some of his magic at the vise.

TECH THURSDAY

California Fly Fishers Unlimited offers a series of programs each month on the "technical" aspects of fly fishing. The program covers fly fishing topics, ranging from beginning fly casting and introductory fly tying, to more advanced topics such as rod building, tying Atlantic Salmon patterns, and spey casting. Let Carl Lang know if there are any subjects you would like to see... or to teach! Tech Thursday's are held on the third Thursday of the month at the Northminster Church, 3235 Pope Avenue, Sacramento, CA

NAME BADGE DRAWING by Rich Wilson

Each month we will be drawing for a $30.00 gift certificate to be redeemed at one of the 3 fly shops in our area. Each month the $30.00 gift certificate will be from a different fly shop in rotation. To qualify for the name badge drawing a member MUST be wearing his or her CFFU engraved name badge. Each member will receive one ticket for wearing his or her engraved badge. At the end of the meeting one ticket will be drawn for the gift certificate. You must be present at the time of the drawing. New members will still be eligible to receive the 10% off any item at the LOGO table.

FREE FLY DRAWING

Bring a Fly to the monthly meeting and have a chance to win. Drop the fly in the cup at Rich Wilson's desk and receive a ticket. At the end of the evening, a ticket is drawn and the winner gets all of the fly's in the cup.

NEW MEMBER ORIENTATION

New members are encouraged to attend one of the quarterly meetings held at the Northminster Church, 3235 Pope Avenue, Sacramento, CA. The meetings occur on the second Wednesday in February, May, August, and November. 6:30 p.m. Here you can meet other new members, ask questions, receive contact information and possibly find a fishing buddy. President Laurie Banks and Membership Director Rich Wilson supervise these meetings and will help you get the most out of your club. You will also receive a certificate for 6 free flies from local fly fishing shops. Look for more info in the coming newsletters.

MARK YOUR CALENDARS

March 6	CFFU Board meeting at 6:30 pm

April 26	Social Night - Topic: Coachman Challenge

FLY FISHING 101

This class is generally offered on two consecutive Tuesdays, from 6:30-8:30 p.m. Location: Northminster Church (Social Hall, 3235 Pope Ave., Sacramento).

This class for new fly fishers includes: selecting the proper fly rod and reel, essential knots, rigging the fly rod, selecting flies, safety, equipment and accessories. Participants bring their fly rod and reel, leader material and tippet material to the first class. If you do not yet own a rod, let us know. We will provide you with a loaner rod and reel. If you have any questions, please contact the course coordinator, Tim Landrus.

FEBRUARY 2017 SPEAKER

On February 7th, we were treated to an outstanding program from Southern California fly fishing guide Ernie Gulley that featured Crowley Lake fishing tactics. Crowley is called the "Crown Jewel of the Eastern Sierras" and rightfully so! The trout in this fertile lake are always in fabulous condition due to an extreme abundance of natural food. Ernie went over the various insect hatches including Damsels, Callibaetis, and most importantly, Chironomids. The Midges in this lake proliferate at such a rate that the fish feed on them incessantly for most of the year. He also mentioned bait fish like perch as being another important food source. He showed which flies to use in each fishing scenario and encouraged us to not be afraid and change things up often. He talked about the history and geography of Crowley and listed the cold water streams that feed this lake. He also revealed his "hot spots to fish" based on seasonal conditions like water temperature, food sources and migratory inclinations of the trout.

Ernie has helped pioneer the way we fish indicators and it was a real treat to learn from the master! He shared so many tips on how to find fish and control the depth of our flies that it was almost like listening to a scientist! We also learned what to look for in the way of structure, how to use wind to our advantage, and how to use sinking lines and stripping tactics that work in Crowley as well. This was a terrific program that had everyone's attention. Many questions were asked and answered and I think we all left with a much better understanding of still water fly fishing.

Thanks Ernie! Tremendous program!!

Ken Giesser

Programs Director

TECH THURSDAY

On February 16 Tech Thursday presented an Introduction to Rod Building class. Larry Lee owner of L3 rods www.L3rods.net led the class. Seven CFFU members came to participate. Larry gave us an overview of the rod building process. Interested members then arranged times to meet with Larry. Rod builders will go to Larry's workshop where he will give one-on-one help. At the first session, participants choose their blank, guides, handles, tip top and spine their rods. The second meeting is all about tying on the guides. Larry sends you home with the equipment you need to practice and finish wrapping the guides. The third meeting is the epoxy stage and finishing the rod. Each session takes about 2-3 hours.

This is a great way to learn the process of rod building and gain from Larry's vast experience. The finished rod is not only personalized but can be made for approximately half the retail price.

2017 ISE SHOW

CFFU was at the annual International Sportsmen's Exposition (ISE) event at Cal Expo in Sacramento, January 19-22, 2017. The ISE is one of CFFU's annual new members recruiting event, and we also raise funds for club activities and Kids programs by direct solicitation and a fly rod raffle. I asked club members to volunteer and help participate in manning our membership booth and making this year's recruiting drive a success. I would like to thank everyone who helped with the ISE CFFU Membership Booth this year. Helping set up the booth two days before the show was: Howard Ross and Greg Howard. On the first day of the show, I drove to the Nimbus Fish Hatchery to pick up the fish for our fish tank display. I would like to extend a special thanks to Larry Lee for building and donating the Fly Rod for our booth raffle. The members who helped man the membership booth during the ISE show were: Bob Bettati, Dick Angus, Rob Scafe, Gary Howard, Laurie Banks, John & Earlene Coldiron, Meloney Welborn, Ron Adams, Paul Wisheropp, Andy Penn, Joe Puglisi, Chuck Odell, Mike MacBride, Toni Granico, Julie Kaye, George Lazar, Dave Tevlin, John McAllister, Sheila Cavanagh, Tim Landrus, Jeff Howard, Mike Williams, Dave Lentz, Mary Ellen Mueller, and I Rich Wilson. During the ISE show we recruited 6 new memberships with a number of people who said they were interested and would attend our regular meeting to check us out. Thank you everyone for all your help and dedication during this year's Sportsmen's Exposition!

Rich Wilson
Membership Director
CFFU ISE Chairman

CFFU's booth at the 2016 ISE show.

NEW MEMBER'S MEETING

On Wednesday, February 8, we had 14 new member attend the quarterly new members meeting. Their names are: Kay Fong, Marna Ambroselli, Kevin Burdide, Rich Drawbert, Jeffrey Gordon, Ken Perry, Paul Schindler, Wesley Smith, Alice Strobel, Gene Stobel, Dan Walters, Lena Wu-Fuentes, Kate Johnston. To the other new members who were unable to attend, we extend an invitation to attend our next quarterly new members meeting on Wednesday, 10 May at 6:30 p.m. The CFFU members who attended were: CFFU President Dave Lentz, Past President Laurie Banks, New Members Liaison Jim Walker, and I, Membership Director, Rich Wilson. Laurie Banks chaired the meeting and informed our new members of all aspects of the club, answered questions and lead discussions regarding what CFFU is all about. At the end of the meeting we all enjoyed the brownies Laurie made and our new members were presented with a certificate for 6 free flies from each of the three fly fishing shops in Sacramento and Roseville for a total of 18 free flies, that alone more than covers the cost of their membership dues for the first year.

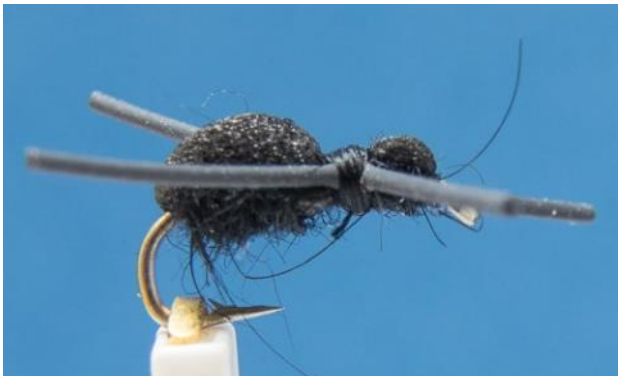
FLY TIERS EXCHANGE by Don Wallace

Photo's by James Simon

Rob Scafe tied a **Wiggle Legs (also known as Pat's Fly)** on a size 4-10 2X or 3X long hook using 6/0 black, brown, or olive thread. An appropriate size gold bead is the head. The fly is weighted with lead wire from the bend of the hook to the bead and back over itself 1/3 of the way to the bend. The thread is wrapped to a taper covering the lead. Appropriate color rubber leg material is tied in at the bead, middle and tail of the hook. The body is chenille in black, brown or olive, or any other color. The flies can be tied in any color, just make them heavy to get them deep.



John Coldiron tied a **Black Foam Ant** on an Umpqua size 18 sproat, 1X long, 1X strong nymph hook using black 6/0 uni-thread. The legs are black round rubber and the body is black 2mm thin fly foam. The head is Umpqua flexament.

Christie Roberts tied a **Red Bead Head Prince Nymph** on a size 10 hook using 8/0 red thread. The head is a red tungsten bead. The tail is brown turkey biot. The abdomen is peacock herl and the wingcase is white turckey biot. The legs are wrapped partridge.

The demonstration fly was tied by **Ty Espinoza** and was the **CDC Bead Head Pheasant Tail Nymph**.

FLY OF THE MONTH

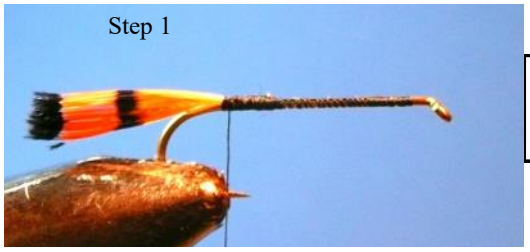
Original "Picket Pin"

Tied and photographed by: Dell Clark

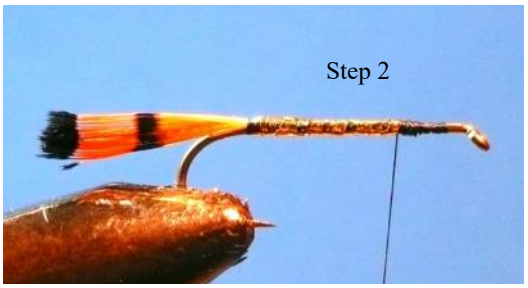
MATERIALS:
Hook - 2x long, sizes 4-10, such as TMC 5262
Thread - Black
Tail - Golden pheasant tippet barbs
Body - Oval gold tinsel
Wing - Gray squirrel tail fibers
Hackle - Brown
Head - Peacock herl

This fly of the month originally appeared in the April 2014 newsletter.

The Picket Pin fly has gotten quite a bit of notice lately, first as the Otters' fly of the week, then demonstrated before the January CFFU meeting (2014), and then as the Fly of the Month for the February CFFU newsletter (2014). I thought I'd bring the fly full circle and present the original 1915 pattern developed by Jack Boehme (see February 2014 newsletter for details). This pattern has under gone quite a few changes from the original and a search of the internet will show many of them. This original Picket Pin pattern is taken from Terry Hellekson's book, "Fish Flies - The Encyclopedia of the Fly Tier's Art." This is an interesting and very informative book.



Step 1: With a barbless hook in the vice and a full thread foundation the length of the shank, tie in 12 or so golden pheasant tippet barbs, making them nearly as long as the hook shank.



Step 2: Tie in the gold oval tinsel at the 3/4 spot on the shank. Wrap it back toward the bend on the hook and then wrap it back to its tie in point and tie it off. This will serve to completely cover the thread.

Step 3: Tie in a clump of gray squirrel tail fibers that extend over the body to the end of the tail.

Step 4: Tie the brown hackle on as a collar and tied back.

Step 5: Tie in two or three peacock herls and wind forward to form the head. Whip finish and you have the Original Picket Pin.

Copyright (c) 2017 CFFU— All rights reserved.

Upcoming outings

UPCOMING OUTINGS

FOR DETAILS ON A PARTICULAR OUTING, PLEASE CONTACT THE FISHMEISTER OR ASST. FISHMEISTER

March 25, 2017	**Lower Yuba (UC Preserve)**	**Fishmeister: Mike Wigginton; tr109mike@comcast.net**
March 31 - April 2, 2017	**Pyramid Lake**	**Fishmeister: John Daniels; jedaniels@ucdavis.edu**
April 9 - 11, 2017	**Lower Sacramento River**	**Fishmeister : Jeff Howard; jhighcntry1@gmail.com**
April 22 - 23, 2017	**Pyramid Lake**	**Fishmeister: Meloney Welborn; melwel2222@gmail.com**

LOWER YUBA OUTING MARCH 25, 2017

SUMMARY:
The Lower Yuba River is one of California's top wild trout tailwater fisheries. The Yuba river rainbows are known to be hard fighting and at this time of year they are usually willing to rise to dry flies that are big enough for us to see. UC Davis opens up their Sierra Foothill Research Station to fly clubs allowing 20 anglers a unique access to fish the Yuba River between Englebright Dam and the Hwy 20 bridge. This section of the river receives far less pressure than the rest of the river but the fish are still pretty wary.

MEETING LOCATION:
8279 Scott Forbes Rd Browns Valley, Ca 95918
We must enter property as a group so we will meet by the gate and enter together. NOBODY ENTERS ON THEIR OWN!

DIRECTIONS:
A good meeting place is the gas station at Hwy 20 and Marysville Rd. From there drive east on Hwy 20 for 2.5 miles, turn left on Peoria Rd for 1.6 miles then take a slight right onto Scott Forbes Rd. The entrance is about 3.5 miles from there. Park on the shoulder of the road until everyone has arrived, at that point I will hand out passes and we will enter as a group.

MEETING TIME:
8:00 am

FISHING FEES:
$10 (covers fees charged by UC Davis and main course for lunch)
UC Davis limits this outing to 20 people so the first 20 people with $10 cash will be on the list. We will also have a wait list.

EQUIPMENT RECOMMENDATION:
4-6wt rod with floating line (sink line if you want to throw streamers or swing flies), 3-5x leaders, split shot, strike indicators, waders, wading boots (preferably with spikes), I would also recommend a wading staff. 2017 California Fishing License with a Steelhead Report Card

FLIES:
Dries:
Skwala Stone or Olive Stimulator, 10; March Brown, 12-14; Parachute Adams, 14-18; Comparadun, Olive, 16-18;
Blue Winged Olive (BWO), 18-20;
Nymphs:
Fox Poopah, 14-16; Prince Nymph, 12-16; Rubberlegs Stone, 6-8; Pheasant Tail, 16-20; Micro May, 14-18; Hogan's S&M, 16-18

MEAL INFORMATION:
Around 1:00pm a prepared lunch is planned. Part of the fee for this outing covers the main course. Please bring a side dish to share and your own beverages. Please let Jeff Stephens (FFJeff4@AOL.com) know what side dish you are planning to bring.

FISHING NOTES:
The most effective way to fish the Lower Yuba River is with nymphs, either tight line/Euro or indicator. On a normal water year, whatever that is in California, this is Skwala and March Brown time so there could be some opportunities for dry fly action. If you're into Spey fishing swinging soft hackles and caddis pupah can be very effective.

Mike Wigginton

PYRAMID OUTING MARCH 31-APRIL 2

Nestled in a desert valley northeast of Reno and fed by the Truckee River is Pyramid Lake, home of the Lahontan Cutthroat. During the spring, the fish are always in the shallows in large schools searching for food. While the numbers are not what they used to be, you still have a better than average chance of catching a good number of fish in the 20-28" range...and there are also 20# leviathans (and bigger) cruising the shore these days. This is an outing for serious fly fishers who have the wherewithal and daring do to rise to the challenge of Pyramid and find their own bit of glory. Those of you who need to be told where and how to fish and have their hands held for the day, had best talk to Melonie about her pay-to-play outing later in month.

The outing will be March 31-April 2. The lake should be open by then but if not, the alternate date is the following weekend. Most will be staying in town, and a meeting place for breakfast in Sparks will be announced later, along with a meeting place for Saturday at the lake. There is a lot of coastline to fish and almost all of it will produce. If you miss the meeting time, then cruising the beaches with an FRS walkie-talkie tuned to the club frequency/code (10-4) is your best way of finding folks, because there will be members from Warrior's to Dago Bay, and many points in between. Cell phones do not always function at Pyramid, so having a radio is a must and expect no sympathy from the fishmeister if you show up without one. If you are going up earlier and do not know the area, let me know, and I can see if I can hook you up with someone else.

To fish Pyramid, you need a bit heavier rig than usual. The typical setup is an 8 weight with a shooting head. This could be either a traditional running line & head combination (floating or sinking running line with Type 3 & Type 6 heads, sometimes heavier), or an integrated line with a 200+ grain head (5-6 ips sink rate, Teeny T200 or Rio Outbound Short), and straight 10-12# leader. You can get away with a lighter rig, but if the wind comes up, and it often does, you will have problems. Typical flies used are Woolly Buggers and Woolly Worms, size 4-8, HEAVILY hackled (colors: black, olive, chartreuse, white, purple, yellow, blue, etc.) on a straight 10-12# leader. Pyramid Beetles and Tadpoles in white/chartreuse and black/chartreuse are also a good idea. Indicator fishing can also be effective, so you may also want to bring a 6-7 weight, bobbers and a selection of flies. For flies, #12-10 nymphs work well, and local favorites include: Flashback Pheasant Tail, Copper John, Mahalo Nymph, Mahalo Midge, and chironomid patterns. Typically, 8# tippet is as light as you want to go when indicator fishing, with some recommending 10# these days. You will need waders and boots and enough clothes to cover every eventuality because the conditions at Pyramid can range from shirtsleeve weather to sleet and snow. Leave your dinky little trout net at home and either invest in a Landing Hand, or a steelhead-size net. You will also need a fishing permit, which you can get online, at most sporting goods shops in town, and at Crosby's. If you plan on driving on the beaches a 4WD is REQUIRED -- and a 4WD can still get stuck, so use caution. Ladders are optional and unnecessary, and float tubers MUST stay a reasonable distance away from the fishmeister (1-2 miles) and have their liability waivers and life insurance up to date. Attendees will be responsible for their own lodging, food, and debts at the casinos.

A sign-up sheet will be available at the next general meeting.

P.S. Latest news is that part of the lake may be open as early as in 2 weeks, and the whole lake will be open 4/1. Watch this space for further updates.

John Daniels

OTTER'S ACTIVITIES

The OTTER'S (OLD TIMERS TYING, EATING and RECREATIONAL SOCIETY) generally meets weekly for lunch, fly tying and fishing. Everyone is welcome at CFFU OTTERS events. Even "working" folks who may have a day off. An e-mail is sent on the CFFU listserv before each activity; please respond if you will be attending and then just show up.

Check the listserve for upcoming OTTERS events.

CALIFORNIA FLY FISHERS UNLIMITED

CFFU is a non-profit community organization serving Sacramento and statewide. Since its inception in 1962, the club's objective has been to promote increased awareness and participation in the art of fly fishing, particularly among families. CFFU also promotes the enhancement and preservation of resources through conservation efforts and in-school programs. Club activities and membership participation include monthly fly fishing programs where special guest speakers provide information on angling around the world. The club also has at least one club outing a month on the water, technical fly fishing clinics and classes, and conservation projects.

Meetings are held at 7:00PM on the first Tuesday of the month at Conzelmann Community Center, 2201 Cottage Way, Sacramento, CA.

Individual annual dues are $30 per member, $45 per family, renewed in January of each year and prorated after June 30th for those joining later, and a $10 initiation fee.

Board of Directors meetings are held on the Monday preceding the regular first Tuesday meeting at East Ranch Clubhouse, 150 East Ranch Road, Sacramento, CA 95725

ON THE FLY is the official monthly newsletter of the California Fly Fishers Unlimited, P.O. Box 162997, Sacramento, CA 95816.
